

TEILHARD DE CHARDIN SCHOLARSHIP ESSAY AWARDS

AWARD IN MEMORY OF TAKASHI KITAHARA

Kenichi Takai
Dean of the Graduate School of Science and Technology
Tomoharu Shibuya
Dean of the Faculty of Science and Technology

As in previous years, Teilhard de Chardin scholarship grants will be awarded for the better essays submitted under the conditions explained below. These scholarship awards are made possible through a fund donated to Sophia University by Belgian admirers of Teilhard de Chardin. This donation was received by the late Professor Emeritus (Father) Jean Kitahara-Frisch of the Sophia Life Science Institute. Starting in 2008, a new Award in memory of Takashi Kitahara has been presented, in honor of the late Professor.

1. Qualifications: Any 4th year student in one of the faculties of Sophia University
Any student in one of the graduate programs of Sophia University
(However, he/she should be currently enrolled in a regular course.)
We welcome submissions from students who are members of other faculties/graduate programs.
2. Language: Japanese or English
3. Topic: How would Teilhard de Chardin reflect on the rapidly changing modern society and respond to it?

Read at least one book by Teilhard de Chardin and write along his ideas. However, your essay should strictly adhere to the topic.
4. Format: Written using typewriter or word processor on A4-size paper; 6000 to 8000 characters in Japanese or 3000 to 5000 words in English.
 - * Give a sub-title to your essay in addition to the above main title.
 - * On the first page, write down the title, sub-title, student number, name, department/graduate program and a short summary: 600-800 Japanese characters or 300-500 English words.
Begin your essay on the second page.
 - * On top of each page, in the right-hand corner, write your family name and a fraction that indicates what page this is: page #/total number of pages.
 - * This essay should be an original submission; the copyright on each essay will belong to the educational legal person *Jochi Gakuin*.
 - * The award-winning essays will be uploaded on the official website of the Faculty of Science and Technology, Sophia University.
 - * We will not return the essays that were submitted.
5. Deadline: Sunday, December 4, 2022, at 23:59 (JST)
6. Submit via e-mail: f-scitec@sophia.ac.jp
 - * Essays should be submitted by the deadline as MS Word files (docx files) attached to the above email address. Printed submissions are not required.
7. Awards: Gold Prize: ¥300,000 (one person)
Silver Prize: ¥200,000 (one person)
Bronze Prize: ¥100,000 (two persons)
Award in Memory of Takashi Kitahara: ¥50,000 (one or more persons)
8. Award Ceremony: Monday, March 20, 2023
 - * Award winners will be informed personally.
 - * All award winners are required to attend the ceremony.
9. Further information & queries: Dean's Office (Tel 03-3238-3300), f-scitec@sophia.ac.jp

TEILHARD DE CHARDIN'S SIGNIFICANCE TODAY

As the accompanying curriculum vitae clearly indicates, Teilhard de Chardin was a well-known and respected scientist. His contributions to the geology and paleontology of China are still highly estimated in that country today.

Yet, Teilhard could never bring himself to limit his interests to the field of science. Research was, in his eyes, a springboard to allow him to penetrate the meaning of cosmic and biological evolution and to situate the human race therein. Above all, while tracing our roots in this evolving universe, his eyes remained focussed on the future of the cosmos and of Homo.

Such a perspective led him to interpret the future of human society as a prolongation of the history of Life and to urge us to become aware of our responsibility not only toward our own future, but also toward that of Life and of the Earth as a whole.

We thus understand why Teilhard still inspires scientists and all of us, even long after his death in 1955. It is not because he provides us with ready-made solutions to today's problems. Rather, it is because he shows us by his example what should be our attitude for grasping the full meaning of the problems that confront us in the opening decade of this century.

Above all, we learn from him that a more intense and more human way of life has become the first and essential condition for survival --- both for our own and for that of Life on earth.

TEILHARD DE CHARDIN

- 1881.5.1 Born in Auvergne region (Central France).
- 1889 Graduated from high school and entered the Society of Jesus.
- 1911 Ordained a priest after completing the study of philosophy and theology. Began the study of human paleontology in Paris under the direction of Marcelin Boule, well-known for his research on Neanderthal Man.
- 1914 Called to service in the French army; served as a stretcher bearer in a colonial regiment.
- 1919 Returned to the Paleontology Institute to work on his doctoral thesis.
- 1922 Publication of his doctoral thesis, "The Mammals of the French Eocene", which earned him recognition as an authority on mammalian paleontology. Appointed Associate Professor of geology at the Institut Catholique of Paris.
- 1923 Departed for China. He explored the Ordos Region and the Gobi Desert where he found evidence of paleolithic instruments -- a prelude to the discovery of Peking Man.
- 1924 Returned to Paris. His work in China was recognized at several international conventions.
- 1926 Returned to China where he took part in three expeditions.
- 1929 Appointed Adviser to the Chinese Geological Survey: in charge of the study of geology and animal paleontology of Chou-Kou-Tien.
- 1931 In Chou-Kou-Tien he found evidence of stone-tool making and the use of fire by Peking Man.
- 1937-38 Participated in the Harvard-Carnegie expedition to Burma.
- 1939-46 World War II immobilized him in Beijing.
- 1946 Returned to France.
- 1950 Elected to the Science Academy.
- 1951 Sojourn in South Africa. Associate of the Viking Foundation for Anthropological Research (New York)
- 1953 Traveled to Rhodesia and South Africa.
- 1955.4.10 Died in New York City and buried in Poughkeepsie, New York. Posthumous publication of "The Phenomenon of Man."

AWARD IN MEMORY OF TAKASHI KITAHARA

The funds that support the Teilhard de Chardin Scholarship were a gift to the Faculty of Science and Technology of Sophia University from kind and generous benefactors in Belgium. These gifts came to the university through the mediation of the late Emeritus Professor Takashi Kitahara (1926-2007). At the time of the gift he was a full-time faculty member in Sophia's Institute of Life Sciences. During his lifetime at the university he worked untiringly to take care of the administrative details of the Scholarship.

A number of grateful Sophia graduates, who formed a group that took its Japanese name from Dr. Kitahara's birthday, continue to recall the many benefits they received from Dr. Kitahara's example and teaching. They want to repay their debt of gratitude to Dr. Kitahara in a way that will benefit their younger academic and professional colleagues.

Thus, in 2008, they have established this award in memory of Takashi Kitahara through a generous contribution to the fundraising efforts related to the one-hundredth anniversary of the founding of Sophia University.
